

## GLÄT CALCIUM GREASE MP-2

### Product Description

Multipurpose calcium- is a multipurpose calcium-based grease designed for applications where water resistance, good lubrication, and rust protection are essential. It is especially effective in moist environments and is ideal for light to moderate load-bearing components that operate at low to medium speeds.

Due to its excellent water repellency and adhesion, this grease is a preferred solution for automotive chassis points, agricultural implements, boat trailers, and marine environments.

### Product Features & Benefits

- Resists washout in wet or damp environments
- Protects against oxidation and rust
- Smooth, consistent performance at low and moderate loads
- Ideal for outdoor or water-prone applications
- Economical and easy to apply

### Application

- Perfect for non-critical bearings, couplings, and fittings
- Suitable for vehicles, trailers, farm machinery, and maintenance tasks

### Meets or Exceeds

- NLGI Grade: 2
- DIN 51502: G2E-20
- ISO 6743-9: ISO-L-XBAHA2

### Storage & Handling

- Store in a dry, clean environment below 40°C
- Keep away from moisture and dust
- Do not mix with other greases
- Refer to SDS for handling and disposal instructions

### Typical Properties

Property	Method	Unit
Thickener Type	–	Calcium Soap
Appearance	Visual	Smooth, off-white or light brown
NLGI Grade	ASTM D217	2
Worked Penetration (60 strokes)	ASTM D217	265-295
Dropping Point	ASTM D2265	≥90°C
Water Washout Resistance	ASTM D1264	Excellent
Corrosion Protection	DIN 51802	0-0
Operating Temp Range	–	-20°C to +60°C
